PROFESSIONAL SUMMARY

Computer Science Engineering (Data Science) student with solid experience in data analysis, database management, data quality, and report preparation. Proficient in SQL, Python, and data analysis tools including Power BI, Tableau, and Excel. Experienced in carrying out defined data procedures, identifying issues, and delivering accurate routine outputs across three internships. High attention to detail, strong ethical judgement, and committed to compliance and data integrity standards.

SKILLS

Data Tools & Languages: SQL (queries, JOINS, subqueries, aggregations, window functions), Python (pandas, numpy), Unix/Linux basics, C

BI & Reporting Tools: Power BI, Tableau, Microsoft Excel (Pivot Tables, Dashboards, Data Cleaning & Preprocessing)

Core Competencies: Data Analysis & Maintenance, Data Quality & Validation, Database Management, Report Preparation, Routine Procedure Execution, Risk & Compliance Awareness, SDLC

Soft Skills: High Attention to Detail, Sound Ethical Judgement, Communication, Teamwork, Adaptability, Eagerness to Learn

INTERNSHIP EXPERIENCE

CXR Intern (Extended Reality) – GITAM University | Present

- Performed defined data collection and maintenance procedures; delivered routine outputs with thorough accuracy checks
- Maintained technical documentation and escalated data issues to senior team members through proper reporting channels

Space Technology Intern – India Space Lab | Feb – Mar 2026

- Carried out structured data analysis procedures; ensured data quality, accuracy, and consistency across research datasets
- Prepared reports and findings for cross-functional teams, demonstrating sensitivity to audience diversity and clear communication

Data Intern – Main Flow Services and Technologies Pvt. Ltd | Jun – Jul 2025

- Administered defined data procedures using SQL and Python to clean, transform, and analyse datasets; improved processing efficiency by 15%
- Prepared daily reports and routine outputs for business review; ensured data integrity and consistency across all deliverables

PROJECTS

Zomato Delivery Performance Dashboard (SQL & Excel)

- Performed end-to-end data analysis on 45,000+ records; applied cleaning, quality checks, and preprocessing to ensure reporting accuracy
- Prepared interactive dashboards and routine performance reports, improving decision-making efficiency by 20%

SQL Data Analysis Project

- Developed complex SQL queries (JOINS, GROUP BY, window functions, subqueries) for data extraction, transformation, and structured reporting

Smart Food Label Analyzer (Web Application)

- Built a data-driven web application to analyse nutritional datasets and generate personalised user outputs, demonstrating applied analytical thinking

EDUCATION

B.Tech – Computer Science Engineering (Data Science) | GITAM University, Visakhapatnam | 2023 – Present | CGPA: 8.67

Intermediate (Class XII): 95% | 2021 – 2023

KEY ACHIEVEMENTS

- Analysed 45,000+ records end-to-end; prepared dashboards and reports improving operational efficiency by 20% with full data accuracy
- Improved data processing efficiency by 15% through optimised SQL and Python procedures during Data Internship
- Consistently delivered routine outputs with high attention to detail and accuracy across three internships in diverse domains
- Demonstrated sound ethical judgement and compliance awareness across all data management and reporting tasks
