SUMMARY

Computer Science Engineering (Data Science) student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, and Computer Networks. Proficient in Python, C, and SQL with experience in software development, problem-solving, and building data-driven applications. Passionate about developing scalable software solutions and learning emerging technologies.

SKILLS

Programming: Python, SQL, C

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Problem Solving, Software Development Lifecycle (SDLC), Debugging.

Tools: Power BI, Tableau, Microsoft Excel

Web: HTML, CSS

Soft Skills: Communication, Teamwork, Problem-Solving, Time Management, Adaptability, Critical Thinking

INTERNSHIP EXPERIENCE

CXR Intern (Extended Reality) – GITAM University (Present)

- Developed XR-based applications for interactive user experiences
- Collaborated on innovation-driven projects in immersive technologies
- Improved application performance and usability through analytical problem-solving

Space Technology Intern – India Space Lab (Feb – Mar 2026)

- Completed hands-on training in space technology and applied analytical techniques
- Strengthened research and problem-solving skills through project work
- Applied data-driven thinking to solve domain-specific challenges

Data Intern – Main Flow Services and Technologies Pvt. Ltd (Jun – Jul 2025)

- Analysed datasets to support data-driven business decisions
- Improved data processing efficiency by **15%**
- Generated insights to enhance operational performance and reporting accuracy

PROJECTS

Zomato Delivery Performance Dashboard (Excel)

- Analysed **45,000+ delivery records** using Excel
- Performed **data cleaning and preprocessing** for accurate analysis
- Built interactive dashboards using **Pivot Tables and Charts**
- Identified peak order times and optimized delivery insights, improving efficiency by **20%**

SQL Data Analysis Project

- Developed complex SQL queries using **JOIN, GROUP BY, subqueries, and aggregations**
- Performed data extraction, transformation, and analysis on structured datasets
- Improved query performance and data retrieval efficiency

Smart Food Label Analyzer (Web Application)

- Developed a web application using **HTML and CSS**
- Implemented logic for analysing nutritional data and ingredients
- Provided personalized recommendations based on user health preferences

EDUCATION

- **B.Tech in Computer Science Engineering (Data Science)**
GITAM University, Visakhapatnam (2023 – Present), CGPA:8.67
- **Intermediate:** 95% (2021 – 2023)

ACHIEVEMENTS

- Analysed **45,000+ records** to derive actionable insights
- Built dashboards improving reporting efficiency and decision-making
- Completed internships in **Data, XR, and Space Technology domains**
- Demonstrated strong analytical thinking and problem-solving abilities

ADDITIONAL INFORMATION

- Familiar with **Power BI and Tableau for dashboard development**
- Knowledge of **data cleaning, preprocessing, and visualization techniques**
- Actively learning advanced **Data Analytics and Machine Learning tools**
